Honeywell

Granit™ XP 1991i

Cordless Industrial Area-Imaging Scanner
Quick Start Guide

Agency Model: 1991i

Note: *Refer to your User Guide for information about cleaning your device.*

Getting Started

Turn off computer's power before connecting the scanner, then power up the computer once the scanner is fully connected. When the base is connected and powered up, put the scanner in the base to establish a link. The green LED on the base flashes to indicate the scanner's battery or charge pack is charging.

Power Supply Assembly (if included)

***Note:*** *The power supply must be ordered separately, if needed.*

⚠ **Before you attempt to use, charge or replace the battery in the device, carefully read all labels, markings and product documentation provided in the box or online at sps.honeywell.com. To learn more about Battery Maintenance for Portable Devices, go to honeywell.com/PSS-BatteryMaintenance.**

Avant d'essayer d'utiliser, de charger ou de remplacer la batterie de l'appareil, lisez attentivement toutes les étiquettes, marquages et documentation du produit fournis dans la boîte ou en ligne à sps.honeywell.com. Pour en savoir plus sur l'Entretien de Batteries pour Appareils Portables, consultez-le honeywell.com/PSS-BatteryMaintenance.
Connecting the Base

USB:

Note: *If you are charging the scanner using the USB cable, the current available for charging is reduced and charge times are increased. Charging via the power supply is faster.*

Keyboard Wedge:

RS232 Serial Port:

Reading Techniques

The view finder projects an aiming beam that should be cen-
tered over the barcode, but it can be positioned in any direction
for a good read.

Note: *If the scanner beeps 3 times when scanning a barcode, the*
link has not been established. If the scanner beeps once,
the link has been established.

SR Models:

XR Models:

XLR Models:

Standard Product Defaults

The following barcode resets all standard product default set-
tings.

Standard Product Defaults

USB Serial

⚠️ *If you are using a Microsoft® Windows® PC, you must download a driver from the Honeywell website. The driver will use the next available COM Port number.*

Scan the following code to program the scanner to emulate a regular RS232-based COM Port. Apple® Macintosh computers recognize the scanner as a USB CDC class device and automatically use a class driver.

USB Serial

Note: *No extra configuration (e.g., baud rate) is necessary.*

USB PC Keyboard

Scan the following code to program the scanner for a USB PC Keyboard.

USB PC Keyboard

Keyboard Country

Scan the appropriate country code below to program the keyboard layout for your country or language. By default, national character replacements are used for the following characters: #$@[\]^'{|}~. Refer to the ISO 646 Character Replacements chart in your User Guide to view the character replacements for each country.

USA (Default)

Belgium

Denmark

Finland

France

Germany/Austria

Note: *For a complete list of country codes, see the User Guide for your product.*

Locked Link

If you link a scanner to a base using the Locked Link Mode, other scanners are blocked from being linked if they are inadvertently placed into the base. If you do place a different scanner into the base, it will charge the scanner, but the scanner will not be linked.

‖‖|‖‖‖|‖‖‖|‖‖‖|‖‖|‖‖‖‖|‖‖|‖‖|‖‖‖|‖‖‖|‖‖
Locked Link Mode
(Single Scanner)

To use a different scanner, you need to unlink the original scanner by scanning the **Unlink Scanner** barcode.

Override Locked Scanner

If you need to replace a broken or lost scanner that is linked to a base, scan the **Override Locked Scanner** barcode with a new scanner, and place that scanner in the base. The locked link will be overridden; the broken or lost scanner's link with the base will be removed, and the new scanner will be linked.

Override Locked Scanner

Unlinking the Scanner

If the base has a scanner linked to it, that scanner must be unlinked before a new scanner can be linked. Once the previous scanner is unlinked, it will no longer communicate with the base. Scan the **Unlink Scanner** barcode to unlink a scanner.

Unlink Scanner

Trigger

The following barcodes will allow you to use the scanner in
Manual Trigger – Normal Mode (need to press the trigger to
read) or **Presentation mode** (the scanner is activated when it
"sees" a barcode).

Note: *Presentation Mode continuously draws power, so use of
the external power supply is recommended for this mode.*

Manual Trigger – Normal
(Default)

Presentation Mode

Streaming Presentation™

When in Streaming Presentation mode, the scanner leaves the
scan illumination on all the time and continuously searches for
barcodes.

Streaming Presentation Mode

Suffix

If you want a carriage return after the barcode, scan the **Add CR Suffix** barcode. To add a tab after the barcode, scan the **Add Tab Suffix** barcode. Otherwise, scan the **Remove Suffix** barcode to remove the suffixes.

Add CR Suffix

Add Tab Suffix

Remove Suffix

Add Code ID Prefix to all Symbologies

Scan the following barcode if you wish to add a Code ID prefix to all symbologies at once.

Add Code ID Prefix To All Symbologies
(Temporary)

Note: For a complete list of Code IDs, see the User Guide for your product.

Function Code Transmit

When this selection is enabled and function codes are contained within the scanned data, the scanner transmits the function code to the terminal. Charts of these function codes are provided in your User Guide. When the scanner is in keyboard wedge mode, the scan code is converted to a key code before it is transmitted.

Enable
(Default)

Disable

Support

To search our knowledge base for a solution or to log into the Technical Support portal and report a problem, go to honeywell.com/PSStechnicalsupport.
